Introduction

Computer Science & Engineering student at IIIT Una with an 8.2 CGPA, focused on software and backend development. Experienced with Node.js, Express.js, MongoDB, Mongoose, React, and JavaScript, with strong foundations in C++, DSA, and problem solving.

Education

Indian Institute of Information Technology, Una (IIIT Una)

B.Tech in Computer Science & Engineering

Expected Graduation: 2026

CGPA: 8.2/10

Technical Skills

Languages: C++, C, JavaScript

Frontend: HTML5, CSS3, React

Backend: Node.js, Express.js, MongoDB, Mongoose, RestApi

Programming Concepts: Object-Oriented Programming, Data Structures & Algorithms

Authentication: JWT, Authentication & Authorization

Developer Tools: Git, GitHub, PostmanApi, Cloudinary

Problem Solving: 250+ LeetCode Problems, 2-Star on CodeChef

Projects

YouTube Clone – Backend REST API

Node.js, Express.js, MongoDB, Mongoose, JWT

- Developed a RESTful backend for a YouTube-like video streaming platform using Node.js, Express.js, MongoDB, and Mongoose.
- Implemented JWT-based authentication and authorization with user registration, login, protected routes, and authentication middleware.
- Built APIs for video management including video upload, retrieval, updating, deletion, and ownership-based access control.
- Implemented social features including video likes, comments, channel subscriptions, playlists, and tweets using modular controllers and Mongoose schemas.
- Developed channel dashboard analytics to calculate total video views, subscribers, uploaded videos, and accumulated likes using MongoDB queries and aggregation pipelines.
- Designed reusable middleware for authentication, file uploads, and centralized asynchronous error handling while following a modular MVC architecture.

Clipboard App

React, JavaScript, HTML, CSS

- Developed a web-based clipboard management application using React and JavaScript for creating, storing, editing, and managing text snippets.
- Implemented reusable React components for better code organization and maintainability.
- Added functionality for creating, viewing, editing, and deleting clipboard entries.
- Designed a responsive interface for seamless usage across desktop and mobile devices.

Portfolio Website

React, JavaScript, HTML, CSS

- Designed and developed a responsive personal portfolio website to showcase projects, technical skills, achievements, and academic background.
- Built reusable React components to create a modular and maintainable frontend structure.
- Implemented responsive layouts and interactive UI elements for a consistent experience across desktop and mobile devices.
- Organized project and profile information into clear sections for an accessible and professional presentation.

Achievements

- Solved 250+ problems on LeetCode, demonstrating consistent practice in Data Structures & Algorithms.
- Achieved a 2-Star rating on CodeChef through consistent competitive programming practice.
- Maintained an 8.2/10 CGPA at the Indian Institute of Information Technology, Una.
